CARBON CLARO

Lightweight at the sight, robust in the structure. The Carbon Claro table features a precious solid charred claro walnut combined top with thin carbon legs in different colour finishes. The two elements connect seamlessly in a continuous movement, creating a complex yet logic merge that makes a very stable yet light table perfect for managerial offices or private dining rooms where things happen and thoughts seem elegantly clear.

DESIGNERS

Asobi is a product design consultancy that made its international debut in 2005 at the London Design Festival with their prototype of the spellbinding Isle Lounge sofa. In 2011 Asobi presented its new furniture and lighting label, Tokio, with the debut of the Carbon Light at the Qubiqa Design Fair in Berlin. In 2014 Carbon Light, a high-performance modular LED suspension light, was selected as a finalist in lighting products at the Architizer Awards. To follow its quest for extraordinary products Asobi joined forces with an architectural designer and self-taught craftsman Taylor Donsker. Together they have executed yet another discerning work of design that sits easily even with styles of eras gone by. Taylor Donsker's interest in combining materials with opposing properties stems from his personal philosophy, "Every material has a grain, a strength and a weakness, an origin and an end."
